

Numatic SSV250

The all stainless steel construction of the SSV250 offers people just that little bit more than the average vacuum cleaner. It's 9 lt capacity means you are not always changing bags and the giant Tritex filter makes sure what goes in stays in.

The power head incorporates Numatic's patented noise reduction system, Twinflo performance is superb -to good sometimes- so a Hi/Lo control has been fitted so you can turn the power down if necessary.

You also have superb 4 wheel mobility and stability and the standard accessory kit is to the same high standard even down to stainless steel tubes and full size combination nozzle.

Motor	Power	Airflow	Suction	Capacity	Range	Weight	Dimensions
1200W	230V	45 L/sec	2600mm	9lt	26.8m	8.3kg	340 x 340 x 395mm
