

## WV380 – Heavy Duty Wet or Dry Vacuum

The WV380 offers all the same functionality of machines like Charles, but with an impact resistant Structofoam drum that makes it ideal for heavy duty cleaning and professional users.

All WV machines are wet **or** dry and the change from one to the other is designed to be simple – just exchange a dry filter for a wet safety float valve and change the floor nozzle.

It is important that you do not mix both the functions of wet and dry. The result can be a container full of almost mud which becomes difficult to empty and will be detrimental to performance.
