

WV470 – Wet or Dry Vacuum

The WV470 provides a larger alternative to Charles, with twice the capacity - the same high performance standard, be it wet or dry.

All WV machines are wet **or** dry and the change from one to the other is designed to be simple – just exchange a dry filter for a wet safety float valve and change the floor nozzle.

It is important that you do not mix both the functions of wet and dry. The result can be a container full of almost mud which becomes difficult to empty and will be detrimental to performance.
