

# TwinMop Professional *TM2815, TM2815W*

The TwinMop series was a world first, being compact in size, robust in construction and incorporating our unique AWS (Automatic Water Separation) system.

AWS means you only work from the front oversized 28 litre clean water bucket, with dirty water automatically discharged into the rear, red handled dirty water pail.

The TM2815W has all the features of the TM2815 but incorporates a clever on-board 30 litre lidded waste bin and deep storage tray allowing increased scope within the cleaning regime.

TM2815W

TM2815 with fixed transit wheels

Optional wet floor sign

Optional larger tray and pail

Optional All-Terrain fixed transit wheels

AWS - Automatic Water Separation

TM2815

TM2815W

Allmops press

Optional mop kits

See pages 28-29 for full mop kits, holders and mops
